

Make the screen easier to see.

A few one-time changes make every word on your phone bigger and bolder — in your messages, your menus, everywhere.

SET UP • ONE TIME **Bigger and bolder words**

You only do this **once**. A family member or helper can sit beside you and do it with you.

1

Open **Settings**, then **Accessibility**

Two quick taps to get started.

2

Tap **Display & Text Size**

It's near the top of that screen.

3

Turn on **Bold Text**

The switch turns green — every word gets thicker.

B

4

Drag **Larger Text** bigger

Slide it right until the sample feels comfortable to read.

AA

None of this is permanent. Don't like a size? Just **slide it back**. You can't harm anything by trying.

A few more helps.

FINE-TUNE More ways to see clearly

Already bigger and bolder? Any of these can help even more — and **all turn right back off.**

Turn up the brightness.

Swipe down from the top-right corner; drag the sun slider up.

Make the text sharper.

In Display & Text Size, turn on “Increase Contrast.”

Make menus easier to read.

Just below it, turn on “Reduce Transparency.”

Make the icons bigger too.

Settings → Display & Brightness → Display Zoom → Larger Text.

Still too small to read?

Reach for the Magnifier — it enlarges anything, even the screen.

Mix and match until the phone feels **easy on your eyes.** There’s no wrong choice — only what’s comfortable for you.
